PROSE

Who We Are

Rosenberger Hochfrequenztechnik GmbH & Co. was founded in Germany in 1958 and ranks among the leading manufacturers of high-speed interconnect solutions worldwide. With its long tradition of excellence and innovation, Rosenberger has excelled and earned an outstanding reputation all over the world.

In early 2022 the Rosenberger Group announced the restructure of its antenna and coverage solution product portfolio with a new brand entity PROSE. The strategic focus of PROSE will be on the development of base station antennas, microwave antennas, indoor and outdoor coverage solutions, Open RAN sub-systems, data center, cabling system, IoT solutions, Automotive and related services.

As an independent entity, PROSE, with its lean, agile, and decentralized organizational structure, will be better placed to serve global customers and manage growth by bringing new technologies and solutions, aligned with the changing needs of customers in the telecom industry. The PROSE product portfolio will uphold Rosenberger’s tradition of the highest innovation and quality while delivering improved technology expertise and enhanced local customer support around the globe.

PROSE consists of more than 3500 people, with 40+ subsidiaries sales/service offices, 4 factories, and 7 R&D centers covering mainly North America, Europe, the Middle East, Africa, and Asia. It will continue to serve more than 100 operators/service providers worldwide including a wide set of customized solutions for 5G deployments.

PROSE is an ISO 9001 quality system and ISO 14001 environmental system certified company. Equipped with advanced machinery, automatically assembly, and testing centers supported by a large group of more than 400 R&D engineers, state-of-the-art production assembly lines, and stringent product and quality control.

PROSE’s reliability and competitiveness are the cornerstones of this sustainable growth, which have resulted in long-term partnerships with most of the leading companies in their respective industries. PROSE will continue to provide excellent product solutions and services for its customers around the world.

Archer Site Installation Products (ASIP)

The Archer portfolio includes a variety of specialties in the B-to-B distribution of cutting-edge telecom products and solutions.

A wide product range:

- Cable tie
- Hose clamp
- Standard fasten piece part
- Cabinet system
- Conduit and cable tray
- Label solutions
- Kitting service
- Warehousing/VMI service
- Customized products/solutions

We select the Archer products and technical solutions offered by manufacturers that are best suited to local customer needs. Depending on the country, we can make anywhere from 25,000 to 100,000 products available to customers in the right place, at the right time.

From product to solution

Drawing on the equipment expertise of our staff, we combine the best products in order to offer solutions that meet our customers’ specifications and the needs of end-users.

Service

Every day in countries where we operate, we do everything to be more than just a telecom material provider/distributor. We strive to create and sustain a relationship in which each customer is our partner. With the backing of our multi-channel sourcing network and our powerful logistics, we are able to optimize the supply chain, offer competitive prices and bring innovative and tailored responses to the table.

Mounting Kit

General Description

- Mount kit secures bracket of equipment or cabinet
- Custom designing

Features and Benefits

- Available in HDG or SUS304 material
- UV and corrosion resistant

Description	General Type
Equipment mounting kit	
RRU mounting	
Rack for battery	
Multi-direction adjust adapter	
RRU breaket	
Antenna support	

Conduit Series

Flexible Plastic Tube

General Description

- The tube is used for protection of cables indoor against exterior mechanical influences
- Plastic pipe is lying on the wall or on the ground where should not be pressed

Features and Benefits

- Different materials are available
- Additional protection to insect bit and abrade
- Various dimensions are available as per requirements

HDPE Conduit

General Description

- The conduit is used for protection of cables outdoor to against the changeable environment, it is always lying under the ground, direct buried or under the tunnel

Features and Benefits

- High density PE made, silicon core layer inside
- Unchanged friction characteristics, easy to extract the cable and repeatedly use in the conduit
- Good sealing performance, chemical corrosion resistance
- Various dimensions are available as per requirement

Typical Products

Cable Ladder and Management

General Description

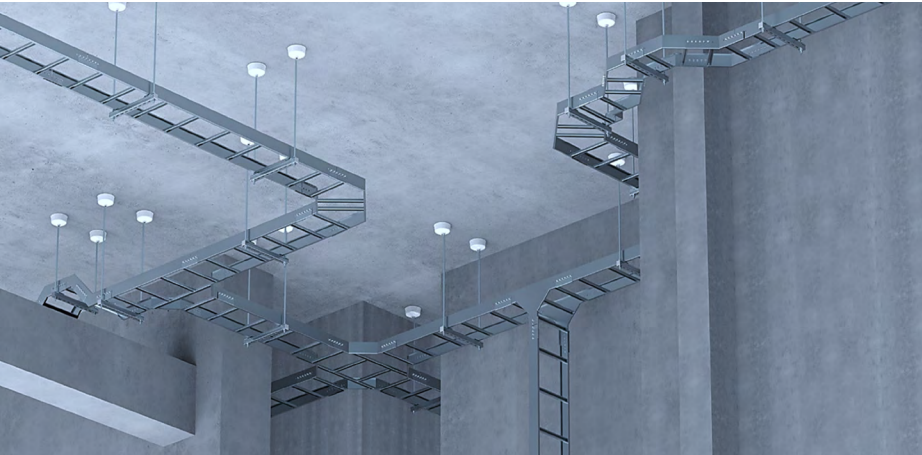

- The cable ladder and cable tray are designed to fix and mounting cables at telecom site
- Mounted in ceiling or on wall
- R&D can redesign according to customer requirements

Features and Benefits

- Plastic or metal material available
- Used in indoor and outdoor
- The ladder can carry a uniformly distributed load of 250kg on each 2m
- Meccano functions make great flexibility
