

EcoVadis 2023 Ranking: PROSE Attains EcoVadis Bronze Medal for Remarkable Sustainability Achievements

Donauwörth, Germany - In a resounding achievement that echoes its profound commitment to CSR (Corporate Social Responsibility), PROSE proudly announces the attainment of the prestigious EcoVadis Bronze Medal for sustainability. This recognition places the company in the top 50% of businesses that have participated in an EcoVadis assessment. The award signifies the relentless dedication of PROSE to responsible business practices and signifies its emergence as a true leader in sustainable corporate operations.

A Milestone of Commitment

The EcoVadis Bronze Medal stands as a symbol of PROSE's unwavering commitment to sustainability. This accolade signifies the company's exceptional performance in areas ranging from environmental protection and ethical conduct to labor practices and sustainable procurement. PROSE's dedication to these principles is further underscored by its score, which positions it among the top tier of organizations recognized by EcoVadis.

A Vision for a Greener Future

PROSE's receipt of the EcoVadis Bronze Medal is a testament to its proactive efforts to minimize its environmental footprint. The company demonstrates its dedication to a greener, more sustainable future by adhering to stringent sustainability practices and embracing ethical conduct. This accolade reflects the dedication and hard work of every member of the PROSE team, from leadership to employees across all levels.

A Pledge for Continuous Improvement

While the EcoVadis Bronze Medal is a remarkable achievement, PROSE understands that the journey toward sustainability is ongoing. Our acclaim extends beyond the EcoVadis recognition, echoing in the authoritative endorsement by the Science Based Targets initiative (SBTi). This affirmation underscores the alignment of PROSE's greenhouse gas emissions reduction targets with current scientific insights. The purpose is clear: a 50% reduction in absolute scope 1 and 2 GHG emissions by 2030, rooted in a 2021 base year, along with a simultaneous 25% reduction in absolute scope 3 GHG emissions.
